Public Works - Water/Wastewater - Engineering Services**

Status: Regular Full Time

Salary Range: \$110,870 to \$138,589 per annum (plus comprehensive benefits and vacation approval)

Work Mode: Hybrid; 1 day on-site per week at 10 Peel Centre Drive, Brampton ON

****see below for more details about this work mode.***

Hours of work: 35 Hours per week

Who we are: The Water and Wastewater Engineering Services Division is responsible for constructing more than one billion dollars per year of housing enabling critical infrastructure to support the provincial housing plans. The Sr. Project Manager is responsible for Managing Large Complex Capital projects. These projects are multi disciplined and normally valued at over \$10,000,000 each. Project duration is usually 3 to 5 years from commencement for projects that include Treatment Plants, Pumping Stations, and Large Diameter Trunk Watermains. While most projects are growth related in accordance with the Regions Master Plan to 2041, they will also undertake upgrades to existing operating facilities in conjunction with the expansions as required. Due to the critical timing of projects and risk to existing infrastructure all projects must utilize Capital Project Management Methodology.

What you will do in this role:

- Management of various large complex Capital projects that involve Treatment, Pumping Stations, and Trunk Watermains and Sanitary Sewers, and condition assessment and rehabilitation.
- Managing the selection and procurement process for major equipment and assessment of new technologies.
- Preparing and tendering requests for proposals including defining the scope of work and terms of reference for the expansion of the wastewater system.
- Developing tender documents for contracts
- Evaluating detailed proposals
- Leading Value Engineering assignments when peer review is required to ensure constructability and value.
- Controlling project budgets, schedules, monitoring and reporting on the same
- Liaising with other departments, divisions and sections within the Region as well as with Regional Councillors, external agencies, municipalities and the public
- Negotiating and securing approval from the environmental agencies including CVC, TRCA, MNR, NEC, DFO, MECP
- Negotiate project changes in scope and related extras to minimize Peel's financial risk while maintaining the quality and schedule of the project
- Leading project teams which are also resourced with full time on site consultants
- Directs/manages staff related to the administration of contracts
- Provides assistance and recommendations for the development of the annual Capital Budget

- Provides budget estimates and project scheduling for recommended infrastructure requirements in the Capital Budget and forecasted Master Plan.
- Works with manufacturers and operations staff in determining future operational cost impacts
- Ensures capital projects are well thought through to ensure risk is minimized to existing infrastructure and treatment processes
- Leads the development of CPMM documents and ensures projects are monitored and completed using this methodology.
- Must identify and initiate new business requirements to improve current practices and better assess infrastructure needs
- Must keep continually educated on emerging technologies and changing regulation

What the role requires:

- University degree in Civil Engineering and a minimum of 5 to 8 years directly related experience or an equivalent combination of education and experience.
- A preference will be given to candidates who possess a P.Eng. or CET designation.
- Experience in planning, design and construction of municipal infrastructure including wastewater treatment facilities, pump stations, and large diameter trunk sanitary sewers and watermains.
- Thorough knowledge of wastewater treatment processes, design practices and standards, related codes, regulations, safety acts, tendering/contract process, value engineering and contract administration in order to work independently.
- Construction management of large working groups which includes Contractors, Regional staff, Plant Operators and Consultants.
- Experience completing Environmental Assessments; Experience procuring major equipment
- Combination of education and experience may be considered

Skills/Abilities:

- Exceptional time management skills to be able to coordinate multiple budgets, vendors and contractors to get the work done smoothly, on time and on budget.
- Strong negotiating, planning, scheduling and project management skills
- Political acuity and being able to handle complex or sensitive political matters dealing with project updates
- Strong communication skills with the ability to provide regular updates to internal and external stakeholder groups including Municipal, Provincial and Federal agencies.
- Demonstrate a commitment to diversity, equity, and inclusion through continuous development, modeling inclusive behaviors, and proactively managing bias

Perks @ Peel and why you will love working for us:

- Comprehensive Health, Dental, Vision benefit plan including psychological health, effective start date
- Automatic enrolment into OMERS pension plan
- Accrue Vacation on a monthly basis
- 3 Paid personal days and floating holidays
- Flexible hours supporting your wellness and wellbeing
- Annual performance review and merit increases based on performance
- Supportive leadership and a culture of respect and inclusion
- Access to tuition reimbursement and learning and development resources

Work Mode & Job Location: In this role, you'll enjoy the flexibility of a hybrid work arrangement. This means you'll have the ability to work off-site and on-site as needed, depending on operational needs at the **10 Peel Centre Drive, Brampton, ON** worksite. The frequency of on-site work may vary from week to week, depending on operational demands, which can evolve over time.

It's important to note that your off-site work location must be within the province of Ontario. This ensures that we're compliant with all regulations and policies.

The Region of Peel offers job based flexible hours of work that allows employees to manage personal and professional responsibilities while at the same time ensures business operational needs and customer service expectations are achieved.

Interview: Our recruitment process will include video conference technology

Kindly ensure to regularly monitor your spam and junk email folders, as important communications regarding your application may be directed there.

At Peel Region, we value being open and transparent with our community. Peel Region will not be dissolved. The Ontario government has updated legislation to recalibrate the scope of the Transition Board to seek recommendations on land use planning, water & wastewater, regional roads, and waste management. Peel remains committed to providing uninterrupted services to our residents and businesses through the review. Skilled and qualified professionals are and will be needed to deliver services to the Peel community regardless of the governance model. For information about our transition and how we continue delivering services, visit peelregion.ca/transition.

If this opportunity matches your qualifications and experience, please apply on-line.
