

Executive Director of Pollution Control/Deputy City Engineer City of Windsor

Location: Windsor, ON.

A thriving city, the City of Windsor is one of Ontario's best kept secrets, sitting within a day's drive of over half of the North American population and only 30 minutes from downtown Detroit, Michigan, Lake St. Clair and the north shores of Lake Erie which is home to over 25 local wineries, craft breweries and distilleries. Windsor boasts world class entertainment, iconic food, temperate climate, magnificent waterfront parks, gardens and recreational activities and an innovative workforce with demonstrated capacity in automotive, advanced manufacturing, transportation, life sciences, education and tourism. Known as the Automotive Capital of Canada, Windsor's culturally diverse population of over 250,000 benefit from housing and land costs that are among Canada's most affordable, and the City and surrounding Region continues to experience rapid population growth thanks to its flourishing economy and growing labour force.

The "Rose City" is seeking a new **Executive Director of Pollution Control/Deputy City Engineer** to lead and champion its Pollution Control Division portfolio within the Infrastructure Services Department.

Reporting to the Commissioner, Infrastructure Services and City Engineer, the Executive Director will lead and oversee the engineering, operation, maintenance, and delivery of wastewater services, including daily management of the City's Lou Romano Water Reclamation Plant (273 MLD), Little River Pollution Control Plant (18 MLD), Windsor Biosolids Processing Facility, sewage and stormwater pumping stations (50) and stormwater management ponds (18). This role also includes responsibility for industrial waste/pollutant monitoring and enforcement programs (sewer use by-law), and wastewater system compliance with all relevant provincial legislative and regulatory standards.

The successful candidate will bring demonstrated high levels of customer service along with expertise in the full lifecycle of wastewater infrastructure – from class environmental assessment studies and system design through to construction, commissioning, and ongoing operations. They will be accountable for strategic capital and operating budget development, long-term preventative maintenance planning, plant/system optimization and the effective leadership of a multidisciplinary workforce. Labour relations – including collective bargaining – are also key components of this role, along with strong collaboration across municipal departments, external agencies, and industrial stakeholders.

Qualified candidates will hold a degree in Science or Engineering (Mechanical, Chemical, Environmental, Civil or equivalent), be licensed as a Professional Engineer (P.Eng), and bring a minimum of six years' experience in a managerial role in operations or pollution control (or ten years, depending on level of education). Proven communication, leadership, innovation, teamwork and organizational skills are essential, as is a valid Ontario Class G Driver's License. Certification in wastewater treatment and collection is considered a strong asset. This is an exciting opportunity for a results-driven leader to sustainably shape the future of
