- 300,000 sq ft of flowering space
- 142,000 sq ft of office, fertigation, packaging/processing space

## **VERSION 4: TRIMMING**

Twister T0  
Industrial Scale  
20 kg/hr

## **VERSION 1 BOTTLING:**

Manually Fill  
Jars  
4,000 per day

The image shows a large, complex industrial machine, identified as a Multipond Autofiller, in a factory or laboratory environment. The machine is constructed from stainless steel and features multiple levels and components. A prominent vertical section on the left has a control panel with a small screen. To the right, there are several large, rectangular modules with glass doors, some of which are open, revealing internal mechanisms. A red emergency stop button is visible on a central vertical panel. In the background, there are more industrial structures, including a control unit with a digital display and various cables and pipes. The overall scene is brightly lit, typical of an industrial facility.

# MULTIPOND AUTOFILLER

## **IMPLEMENTED OCTOBER 2019**

Autofiller  
capabilities  
12,000 bottles/day  
X 2

Additional bottling  
line to be added  
**APRIL 2020**

# THE FUTURE

- 50,000kgs of cannabis per year
- 5 crop cycles per grow room/year
- Construction completed early Spring 2019 (s/b 2020?)
  - Estimated up to \$300M revenue
